The index is geared toward subjects, sites, and major figures in the history of the School, and only the major subject of an article. Not every individual has a cross-entry: look for subject and site, first—entries that will tend to be more complete.

Note: The symbol (F) next to an entry signifies the presence of a photograph of the subject. S = Spring [occasionally, Summer] Issue; F = Fall Issue; and W = Winter Issue, followed by the year and page number. Parentheses within subentries surround subsubentries, which would otherwise be indented and consume more space; this level of entry is separated by commas rather than semi-colons. When in doubt in a jungle of parentheses, refer to the right of the last semi-colon for the relevant subhead. Where this method becomes less effective, e.g., at “mega”-entries like the Gennadeion, typesetting devices like boldface and indentation have been added.
