

Aglokritos, ep.

3d BC, 1st half

Coupled probably with fab.

Mikythos (Hesp. 1934, nos. 21-  
22), with Zenon (SS 3786)

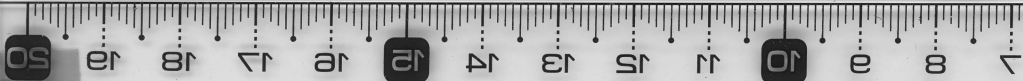

Hiller's date seems too late.

Agora context: a handle of Mikythos and  
a handle perhaps naming Aglokritos <sup>(best under spelling Αγλοκρίτος)</sup> were  
found in the early Rhodian deposit in  
E (contemporary with HAT Group B).

Internal evidence: arched handles with  
hint of angle?

N. 18
