EPHEBIC TEXTS FROM ATHENS

(Plates 2-4)

This epigraphical report offers a number of inscriptions found in the excavations of the Ancient Agora which concern the ephebic corps.

1 (Plate 2). Fragment of Hymettian marble, with part of the top preserved, found in the wall of a modern house (R 9) on September 24, 1937.

Height, 0.098 m.; width, 0.146 m.; thickness, 0.091 m.
Height of letters, 0.007 m.-0.01 m.
Inv. No. I 5012.

fin. saec. IV a. NON-ΣΤΟΙΧ.

\[-\ldots\] ου [\ldots]
\[-\ldots\] αρ [\ldots]
\[-\ldots\] τ [\ldots]

Line 6 suggests an ephebic decree.

4 (Plate 2). Fragment of Pentelic marble, broken on all sides, found on March 11, 1936, in late fill east of the Church of Christ (T 17).

Height, 0.172 m.; width, 0.085 m.; thickness, 0.03 m.
Height of letters, 0.005 m.-0.006 m. Line interval, 0.015 m.
Inv. No. I 3722.
The names belong to the roster of epheboi from an ephabetic decree.

5 (Plate 2). Part of a stele of Pentelic marble found on January 23, 1933, in the demolition of a modern house near the southeast corner of the Market Square. The right side is preserved; the other sides are broken.

Height, 0.075 m.; width, 0.144 m.; thickness, 0.158 m.
Height of letters, 0.005 m.-0.007 m. Line interval, 0.007 m.
Inv. No. I 1233.

6 (Plate 3). Fragment of Hymettian marble, with the left edge preserved but otherwise broken, found under the floor of the Church of Panagía Blacāsaroũ (K 11) on March 2, 1936.

Height, 0.08 m.; width, 0.08 m.; thickness, 0.027 m.
Height of letters, 0.006 m.-0.007 m. Line interval, 0.01 m.
Inv. No. I 3675.
If iota is the correct restoration in line 3, this is the mention of the epheboi in the introductory sentence of the general decree. This assumption is borne out by the remains in line 2, which are obviously part of a name, probably of the proposer of the decree.

For the restorations, see *Hesperia*, XV, 1946, p. 199, No. 40, lines 9-12.

7 (Plate 3). Fragment of Hymettian marble, broken on all sides but with the rough-picked back preserved (?), found on March 1, 1935, in a late wall south of the Tholos (F 13).

Height, 0.148 m.; width, 0.078 m.; thickness, 0.162 m.

Height of letters, 0.006 m. Line interval, 0.012 m.

Inv. No. I 2499.

ca. a. 240/39 a. NON-ΣΤΟΙΧ.

Lines 2-5 contain names of the phyle Antigonis, as is made certain by the erasure in line 6 of the heading for the four succeeding names of epheboi of Demetrias. For the date of the fragment, Meritt suggests, by letter, “perhaps about 240 B.C.” It is definitely not part of *I.G.*, Π2, 787.
8 (Plate 3). Fragment of banded blue and white marble, broken on all sides, which contains part of the general decree honoring the epheboi, the kosmetes, and the instructors of the epheboi. It was found on April 15, 1952, in a collection of marbles from the excavation near the southeast corner of the Agora.

Height, 0.16 m.; width, 0.23 m.; thickness, 0.17 m.
Height of letters, 0.005 m.-0.007 m. Line interval, 0.011 m.
Inv. No. I 6512.

vacat

That this decree belongs to a type which I have called Class II (Hesperia, XXIV, 1955, p. 226)—one general decree which honors epheboi, kosmetes, and instructors, followed by the names of the epheboi arranged by phylai—is shown by the specific inclusion of the formula praising the kosmetes, which immediately precedes the laudation of the instructors (lines 6-7). One may compare I.G., Π², 900, lines 18-19
of about the same year, and also No. 9 below (pp. 15-17). This clause is lacking in ephetic inscriptions of Class III, which have a second decree specifically honoring the kosmetes.

The hoplomachos Persaioi (line 9) may safely be identified with Ἱερόπαντων of Hesperia, XV, 1946, p. 195, No. 38, line 15, of the year 185/4, and with Ἱερόπαντων Συμμάχου Ἐκκυννέα of I.G., I², 900, line 21, of the about the same date.

In line 11, the katapaltaphetes Pedieus, son of Neandros, is doubtless the grand-father of Ἱερόπαντων in the then unpublished fragment mentioned in Hesperia, XI, 1942, p. 300, note 56, and of the same individual who appeared in a citation of I.G., I², 1007 (τὸν ἀφέτην Πεδιέα ἐκ Κεραμέων), both of which fragments are now known to be parts of the ephetic inscription Agora Inv. 1 286, references to which should now be made to Hesperia, XXIV, 1955, p. 231, line 138, and p. 232, lines 292-294, respectively. Unfortunately, in the publication of this inscription the wreath with his citation has been misplaced; it should be on the extreme right end of the first row of citations on p. 232, following the citation for the toxotes, Mystilos of Oe, thus giving five wreaths in the first row. The two remaining wreaths, the one for the grammateus, the other for the hyperetes, should be in the second row, symmetrically placed between wreaths 2 and 3, and 3 and 4, respectively of the first row. The sketch on p. 221, the description in the body of the article on p. 238, and the photograph on Plate 78, Fragment N, give the correct arrangement of the wreaths.

Finally, I think we are justified in restoring as paidotribes the name of Hermodoros, son of Heortios, who was associated with Persaioi and Pedieus in the inscriptions just mentioned, because of the remains of his demotic Χαράκτεια in line 10.

The family trees of Hermodoros and Pedieus have been worked out by Meritt in Hesperia, XI, 1942, pp. 301-302: Hermodoros, son of Heortios, of Acharnai of this inscription is to be identified with Hermodoros III; Pedieus, son of Neandros, from the Kerameikos is identical with Pedieus I.

Of the four inscriptions which now show Persaioi, son of Symmachos, of Kikynna as hoplomachos, two are dated in or near 185/4 (Hesperia, XV, 1946, p. 193, No. 38; I.G., I², 900) and two are undated (I.G., I², 901; the present text). Our inscription, then, must belong about 186/5 or probably a few years earlier, for in 172/1 Neandros from the Kerameikos had taken his father's place in an unnamed branch (Hesperia, XV, 1946, p. 201, No. 40, lines 124-126).

Three, possibly all four, of these inscriptions show a change in the sequence in which the instructors were named for praise, specifically in the replacement of the paidotribes, traditionally the senior official, in first place by the hoplomachos and the akontistes, instructors in military branches:

1 But the caption should be O, and O should be labelled N—it is I.G., I², 1007.
I

ca. a. 185/4 a. or before: *I.G.*, II², 901. The citations on the preserved side of the stone give name and demotic only, but the position of each official is known from the other inscriptions. The sequence, however, cannot be absolutely determined, since the pertinent passage of the decree is not preserved.

(1) paidotribes, (2) hoplomachos, (3) [--- ? ---], (4) [--- ? ---]

II

*Paullo ante* a. 186/5 a.: the present text

(1) akontistes, (2) hoplomachos, (3) paidotribes, (4) toxotes, (5) katapaltaphetes, (6) grammateus

III

ca. a. 185/4 a.: *I.G.*, II², 900 as corrected in *Hesperia*, XV, 1946, p. 197.

(1) hoplomachos, (2) paidotribes, (3) akontistes, (4) katapaltaphetes, (5) toxotes

IV

a. 185/4 a.: *Hesperia*, XV, 1946, p. 193, No. 38

(1) hoplomachos, (2) akontistes, (3) paidotribes, (4) aphetes, (5) toxotes

The paidotribes is named first in all inscriptions prior to II (above) in which members of the families of Hermodorus and Pedieus appear as instructors.² He appears in first place also in all inscriptions subsequent to 185/4, through the second century, wherever the sequence can be determined. It is clear that the order in which the posts and the names of the incumbents were given, both in the body of the decree and in the citations, followed a descending scale of importance, the paidotribes appearing in first place, the grammateus or hyperetes in the last.

The displacement of the paidotribes from the position of honor in the three inscriptions dating from shortly before 186/5 and the few subsequent years must then be explained on other grounds than those of chance, especially since the right to the traditional place was supported in the case of Hermodorus by the prestige of his family, several members of which had held the office of paidotribes in apparently unbroken succession since 267/6.

The disturbed political situation in Greece at this time seems to offer an explanation. In spite of the fact that Rome had put a temporary stop to the encroachments of Philip in Greece in the so-called Second Macedonian War, and had indeed through

² *I.G.*, II², 665 of 266/5; *I.G.*, II², 700 and *Hesperia*, VII, 1938, p. 110, No. 20 of 258/7; *I.G.*, II², 681, of 248/7; *I.G.*, II², 766 and *Hesperia*, XVII, 1948, p. 3, No. 3 of 244/3; *Hesperia*, II, 1933, p. 159, No. 6 of about 232/1 (for the date see *Hesperia*, XI, 1942, p. 301).
the proconsul T. Quinctius Flamininus, at the Isthmian games of 196/5, formally proclaimed all of Greece free, the Greek cities were keenly aware of the precarious nature of their independence. Their very independence isolated them from the military strength which alone made their states viable as political entities. This was particularly true of Athens and the other Greek cities which had no affiliation with the Achaian and Aitolian Leagues.

Philip had made clear his intention to extend his sovereignty over all Greece. In the period immediately preceding the Second Macedonian War he had encouraged and supported no fewer than three devastating incursions into Attica by his subordinates, Nikanor and Philokles, although Athens itself was not taken. When all Roman troops withdrew from Greece in 188 or 187 B.C. the position of Athens became even more perilous. The tensions in Greece growing out of the relations of Philip V to the Greeks and to Eumenes II became so great that swarms of embassies from many Hellenic states came to Rome in 186/5 to pour into the ready ears of the Senate their fears, complaints, and requests.

In this critical period Athens wished to make its ephebic corps as effective as possible in contributing to the defense of Attica. The military branches of instruction were apparently given greater emphasis than before, and this is reflected in the fact that one of the military instructors displaced the paidotribes as the senior member of the staff of the kosmetes. In 185/4 the paidotribes took third place after the hoplomachos and akontistes (Hesperia, XV, 1946, p. 193, No. 38, lines 15-16); in another year very close to this he took second place after the hoplomachos (I.G., II², 900, lines 21-22); in the year of this present text he was almost certainly third in sequence, after the akontistes and the hoplomachos, since the remains of the demotic in line 10 (‘Ἀχαρώνεα) must belong to the paidotribes, who at this time is known to have been Hermodoros, son of Heortios, of Acharnai.

We have here an incidental indication of the predominantly military character of the ephebia in this period, which it perhaps retained until Athens was taken by Sulla. The instruction which was given by the hoplomachos, akontistes, toxotes, and katalpaltaphetes was still primarily for practical military use and not, as later, for primarily educational purposes. The transformation of the ephebia from a military to an educational institution took place slowly.

9 (Plate 3). Fragment of Pentelic marble, broken on all sides but with the back preserved, found in the wall of a modern house (O 17) on November 24, 1937.

---

³ Cambridge Ancient History, VIII, pp. 161-166.
⁵ Ch. Pelekides, B.C.H., LXXXI, 1957, p. 481, notes the increase in numbers of the epheboi which began after 185 B.C.
Height, 0.093 m.; width, 0.175 m.; thickness, 0.054 m.
Height of letters, 0.007 m. (lines 1-7) and 0.01 m. (line 8).
Inv. No. I 5131.

ca. a. 184-171 a.  
NON-ΣΤΟΙΧΙΑ.

This fragment presents two points of special interest. First, there is a clear mention of the gymnasion "in Akademeia," which is specifically named in only one other ephebic inscription, I.G., ΙΙ², 1006, line 20 (122/1): ὁμοιός δὲ καὶ τοῖς ἄλλοις ἠφοιν ἀπασὶν τοῖς τε ἐν Δυκείων καὶ ἐν Ἀκαδημίᾳ. The reading in this fragment is unambiguous: the word cannot be ἀποδημία, which occurs in connection with trips to Delphi (e.g., Hesperia, XXIV, 1955, p. 228, line 18, of 127/6 B.C.), or ἐπιδημία in connection with the stay in Salamis (e.g., I.G., ΙΙ², 1006, line 74, of 122/1 B.C.); and here the visit to the Akademeia was not for the purpose of attending the lectures of the philosophers, but for gymnastic exercises. This fact would indicate a date before the Diogeneion became the regular center for the exercises of the epheboi, shortly after its founding about 200 B.C. (P.W., R.E., V, p. 734).

Obstacles to a date quite so early are the character of the writing and the fact that the words which can be read seem to be part of a separate decree for the kosmetes, which was a characteristic feature of the later Group III inscriptions, the earliest of which seems to have been Hesperia, XV, 1946, pp. 198-201, No. 40, of 171/0 B.C. Moreover, the four ephebic inscriptions discussed above under No. 8, which are dated about 185/4 B.C. or shortly before, contained only one general decree and clearly belonged to Group II. Yet the reference to gymnastic training in the Akademeia seems to me to favor as early a date as the type of inscription will allow. We may assume that in the present instance the activities of the kosmetes were given fuller mention than was customary in the earlier inscriptions of Group II; it would be a logical

---

⁶ Ch. Pelekides, B.C.H., LXXXI, 1957, p. 481, shows that I.G., ΙΙ², 1027, which belongs to this category and which Pritchett and Meritt, Chronology, p. xxviii, had dated in 174/3, must be later, perhaps in the last third of the century.
development in the transition to a separate decree in honor of the head of the ephebic corps.

Secondly, to my knowledge, this is the only ephebic inscription in which the decree proper is separated from the motivating clauses and set off on the stone in larger letters. The most likely sequence is indicated by the suggested restorations, which are taken from I.G., II², 1011, lines 36 and 38 (107/6 B.C.) for lines 2 and 3, from I.G., II², 1006, line 20 (122/1 B.C.) for line 4, from I.G., II², 1028, lines 95-96 (100/99 B.C.) for line 5, and from Hesperia, XVI, 1947, p. 170, No. 67, line 30 (116/5 B.C., with which compare Hesperia, XXIV, 1955, p. 228, line 12 of 127/6 B.C.) for line 6.

10 (Plate 4). This fragment of Hymettian marble, broken on all sides, is part of the long inscription published as I.G., II², 1006, of the year 122/1 B.C., and fills out a lacuna in lines 70-76. In Hesperia, XVII, 1948, p. 23, No. 11, Meritt presented another considerable part of this inscription, and in 'Αρχ. Έφ., 1950/1951, p. 45, No. 25, Mitsos showed that I.G., II², 2485, supplies five names in lines 109-114. The readings of this fragment add nothing to the restorations, except the word πάλιν in line 74. This presents no difficulty, and these lines of I.G., II², 1006, may now be read as given below (parts supplied by the new fragment are underlined).

Height, 0.218 m.; width, 0.139 m.; thickness, 0.176 m.
Height of letters, 0.005 m.-0.007 m.
Inv. No. I 4512.

a. 122/1 a.

I.G., II², 1006, lines 69-76

υπ[ἐρ] τής ἔλευθε-

I have made two minor corrections in the text of the Corpus: the reading in line 74 is νπαπήντη[ηςεν] rather than νπαπάντη[ηςεν], and in line 75 [σ]υμάχους rather than [συμ.]μάχους.

11 (Plate 3). Four fragments of Pentelic marble, apparently containing parts of two ephebic decrees from the same stone. Almost conclusive in identifying the writing is the light upward stroke from the tips of the horizontal lines of the taus, gammas, and sigmas, and also from the vertical and oblique elements of the nus and kappas in all four fragments. They were all found in filling of the second century after Christ, between the foundations of the Stoa of Zeus and the exhedra (H 6). The restorations are to be regarded as those most closely corresponding to the sequences of letter collocations which occur in similar inscriptions, if one assumes a more or less fixed length of line.

a. Height, 0.057 m.; width, 0.059 m.; thickness, 0.029 m.
   Height of letters, 0.005 m. Line interval, 0.01 m.
   Inv. No. I 1013a.
   This fragment was found on June 22, 1933. It is broken on all sides and at the back.

b. Height, 0.066 m.; width, 0.045 m.; thickness, 0.015 m.
   Height of letters, 0.005 m. Line interval, 0.01 m.
   Inv. No. I 1013b.
   This fragment was found on June 23, 1933. It is broken on all sides and at the back.

c. Height, 0.065 m.; width, 0.03 m.; thickness, 0.018 m.
   Height of letters, 0.005 m. Line interval, 0.01 m.
   Inv. No. I 1518a.
   This fragment was found on March 10, 1934. It is broken on all sides and at the back.

d. Height, 0.056 m.; width, 0.035 m.; thickness, 0.013 m.
   Height of letters, 0.005 m. Line interval, 0.01 m.
   Inv. No. I 1518b.
   This fragment was found on March 10, 1934. It is broken on all sides and at the back.

saec. II a. NON-ΣΤΟΙΧ.

a [-------------] καὶ [-------------]
[------------- φιλοτ]μίας ἡ[ν ἔχοντες -------------]
From mention of the paidotribes (line 3) one may conclude that fragment a is part of the decree which praised the epheboi and their teachers, a decree always present down to the end of the first century B.C. in Groups I-IV in extant ephebic inscriptions (Hesperia, XXIV, 1955, pp. 226-227).

The collocation of letters in line 8 commonly occurs, except for proper names, only in two formulaic words in the ephebic decrees of the third to the first century before Christ: (1) in the locution, "(the kosmetes) kept the epheboi obedient τοῖς παραγγελλομένοις," and (2) in the phrase "ὑπὲρ δὴν ἀπαγγέλλει ὁ κοσμητὴς concerning the sacrifices and processions carried out by him for the well-being and the safety of the Council and the Demos." The first formula is found in the separate decree in praise of the kosmetes when it is present. The three sequences of letters in lines 9-11 cannot readily be duplicated at the expected intervals in the phraseology which is found in conjunction with the first formula, but they do fall into place when set on the "grid" of the wording associated with the second formula. This is found in a distinctively new type of decree in ephebic inscriptions (Group III) of the second century
In I.G., Π², 1011, lines 63-83 (107/6 B.C.) there are two identical, and in Hesperia, XXIV, 1955, pp. 230-231, lines 103-127, two very similar decrees of this type in one inscription. In all probability, then, these fragments are to be dated in the second half of the second century, from which period the extant inscriptions containing a decree of this kind originate.

If the restorations in lines 15-16 are correct, only one other instructor (at most two) was named in addition to the paidotribes, if the line is not to be overlong. Line 16 is based on I.G., Π², 1009, line 25, and line 17 on Hesperia, XXIV, 1955, p. 231, lines 141-142.

In line 19 the first gamma is certain, both from the visible horizontal stroke with its finial and from the spacing. The terms epengraphoi and protengraphoi, which occur first in the second century after Christ, and are, in any case, regularly spelled with nu, must be excluded from consideration as possible restorations here. The omikron makes impossible the common expression θύραντες ταῖς ἑγγραφαῖς found in I.G., Π², 1008, line 5, and elsewhere.

12 (Plate 4). Part of an Ionic column capital of Pentelic marble, found in the wall of a modern cellar (M 10) on April 6, 1935. The lower and right top edges show rough pick marks where the molding was hacked away. Eugene Vanderpool has kindly furnished a description of the stone from which I quote in part below.

The inscriptions on this stone are in three different hands and were written on it after it had served its original purpose and had been reduced to its present shape. "The main inscription is on the top surface of the capital where an area has been specially smoothed down to receive it." The left part consists of two lines and is written in "finer, sharper letters"; the right is written in "larger, coarser letters." Three phi's visible in the upper left corner of the main face indicate as many starts in writing φίλαοι; the last time, the word was apparently completed "in a decorative frame" and then erased except for the initial letter.

On the rough broken surface of the left side of the capital part of the name Artemidoros was written in deeply cut letters about 0.03 m. high. On the bolster side of the capital are "four marks which somewhat resemble letters," which, in Vanderpool's judgment, "cannot be counted as an inscription."

The philoi-gorgoi inscriptions are dated from saec. I p., to which period this inscription, no doubt, also belongs. Cf., e.g., I.G., Π², 1968, 1969, 1979, 1984, 1985, 1989.

Height, 0.19 m.; width, 0.32 m.; thickness, 0.23 m.; the top surface on which the main inscription was written measures 0.20 m. by 0.315 m.

7 A similar type of inscription is found among the so-called prytany-decrees.
Height of letters in the main text, *ca.* 0.01 m.-0.017 m.
Inv. No. I 2713.

13 (Plate 4). Fragment of Hymettian marble, with the top and smooth left side preserved, and with a rectangular cutting *ca.* 0.05 m. deep in the center of the top, found among collected marbles (P 12) on April 28, 1938.

Height, 0.088 m.; width, 0.174 m.; thickness, 0.101 m.
Height of letters, 0.01 m.
Inv. No. I 5412.

14 (Plate 4). Fragment of Pentelic marble, broken on all sides, found in a sandy fill of late date (F 12) on February 16, 1935.

Height, 0.101 m.; width, 0.072 m.; thickness, 0.039 m.
Height of letters, 0.006 m.-0.007 m. Line interval, 0.008 m.-0.01 m.
Inv. No. I 2418.
saec. I/II p. NON-ΣΤΟΙΧ.

Ε[- - - - -]

The text preserves part of one column of names (9 lines), and is perhaps part of an ephebic roster.
