

A CONCORDANCE TO *HESPERIA* AND *SUPPLEMENTUM EPIGRAPHICUM GRAECUM* (contd.)¹

THE *comparatio numerorum* between *Hesperia* and *S.E.G.*² is here continued in the light of *S.E.G.* Vol. XXIII. It also includes further addenda and corrigenda which completely replace any previous corresponding entry. To differentiate between an entry which replaces a previously unaugmented and/or uncorrected entry and one which is a further supplement and/or correction to a previously supplemented and/or corrected entry I have marked the former with an asterisk and the latter with an obelisk, both symbols standing to the left of the entry.

I should stress here that, as this Concordance continues to grow by roughly annual stages, it becomes more and more imperative that the user makes a systematic check through all stages in his search for relevant information on any given entry. Otherwise an addendum or corrigendum may pass unnoticed.³

¹ For the two previous stages of the concordance see *Hesperia*, Vols. XXXVI, 1967, pp. 196-224 (note especially p. 196 for an explanation of the system employed) and XXXVII, 1968, pp. 399-425.

² It should be noted that the concordance is limited to the *Attic* portions of *S.E.G.* To date this restriction has merely been tacitly assumed, simply because of the overwhelmingly *Attic* nature of the contents of *Hesperia*.

³ In view of the increasing complicity in using the concordance it would seem desirable to present, periodically, a consolidated concordance superseding all existing stages to that date.
