

## ALCIBIADES

WHEN I said (*Hesperia*, XXXVII, 1968, p. 118, note 1), that my stemma of the Alcibiades-Kleinias family had not been criticized in print as far as I knew I unfortunately overlooked A. E. Raubitschek's remarks in *Rheinisches Museum für Philologie*, XCVIII, 1955, p. 260, note 4. But Raubitschek's suggestion is not an altogether happy one for it makes the rather rare name Alcibiades occur not only in the family of the elder Alcibiades but also in the family of the woman he married, a strange coincidence unless perhaps the woman he married was a cousin. Lack of evidence really makes any suggestion highly speculative, and while some collateral relationship is no doubt possible (whether Raubitschek's or some other), I think it well to stick to a lineal relationship until the contrary is proved.
